Qivation™

Our Story

“WELLNESS ACTIVATION”

Qivation is created out of one single objective, bringing the everyday wellness and health everyone is entitled.

As a group of innovators from Hong Kong, we are creating products that advocate a better and healthier lifestyle. We create products that are innovative, safe and easy to use in stylish designs which fit perfectly in your smart homes and accessible for everyone.

Traditionally people buy a disinfection spray for disinfection, buy a wireless charger to charge their phone. But what else can the disinfection spray provide except disinfection? Qivation has breakthrough this tradition to create the general home and personal products not just offer their own original features but also provide additional purification functions "Multifunctional", have you ever thought that a lightbulb that can light up your place, can provide various lighting effects but also can purify the surrounding area? This is what Qivation do

In addition to developing a series of photocatalyst household and lifestyle products, Qivation also provides **business solutions** for our business partners and consumers

“Upgrade general home accessories with self-antibacterial and purification function”

Purification in a Safe and Natural Way

WHAT MAKES US SPECIAL?

MULTIFUNCTIONAL & UNTRADITIONALLY

Our Technology accrete into consumer products, amenities or accessories. We offer a single application that covers various functions, a desk lamp with a wireless charging function, a LED lamp, and a phone stand, also can purify any small belongings you place on top. A LED light bulb with smart control, offering dynamic lighting effect, energy savings and also can purify the surrounding air. Purification safely, naturally and gradually

★★★★★ **Actually does improve air quality!** [Find Order](#)

Reviewed in the United Kingdom on 14 October 2022

Vine Customer Review of Free Product (What's this?)

Surprisingly, I managed to prove that this DOES actually change the air quality in a room. My partner vapes and the clouds of vape from his device often half fill the lounge - it's visible, sometimes obscuring a clear view of the television several hours into a movie.

As this came with a screw in E27 fitting, I used it in our IKEA floor lamp in the lounge. After scanning the QR code, I installed the app. It was quite a fall as I had to temporarily downgrade our Wi-Fi router, but eventually we had a connection.

We could then operate the bulb from my phone, which is a bit of a pain as it can't be connected to two phones, so we added the Alexa integration within the app - which worked seamlessly.

The bulb's colour temperature can be adjusted from warm white to blue white. The warmer end of the options is perfect for mood lighting.

About two weeks later, I realised that I hadn't had to squint at the TV through a cloud of vape for weeks! So yes, amazingly it is doing something to the air quality.

Hope my review helps someone.

Qivation Product Specification Compliance with Green Specification Of Hong Kong Government

Environment and Ecology Bureau

The Government of the Hong Kong Special Administrative Region
of the People's Republic of China

WHAT is Green Procurement of Hong Kong Government ?

Green Procurement means purchasing products and services that cause minimal adverse environmental impacts. It incorporates human health and environmental concerns into the search for high quality products and services at competitive prices.

As early as year 2000, the Government has amended its procurement regulations to require bureaux and departments to take into account environmental considerations when procuring goods and services.
